

Registered Chiroprapist or Foot Care Nurse

We are looking for a passionate, driven and motivated foot care professional to join our growing multidisciplinary team. The successful applicant should be looking for an environment to grow as a practitioner in a low stress and supportive environment.

We believe that patient-centered care and a one-on-one experience will allow the best healing environment for our clients. Movement Health strives to create an environment where the therapist feels supported and valued, has a great team and support system in place and can grow their practice surrounded by other professionals encouraging them to learn and better their knowledge on a daily basis.

Our office stresses PREVENTATIVE health care by encouraging regular exercise, movement, body awareness and proper supportive nutrition. Movement Health is looking for the *RIGHT* foot care professional to join the team, who is excited to work together with their patients to educate and improve overall health goals.

Setting Type: Multidisciplinary Clinic

Required: Bachelor's or Master's Degree in Nursing (advanced diploma in chiroprapy) with a license in good standing to practice in Ontario, and be able to demonstrate a high ability to apply theoretical knowledge into practice while using problem-solving skills.

- Requires the ability to safely coach, educate and navigate clients with co-morbidities and for sport/athletic conditioning/goals.
- Insurance liability to practice

Knowledge and/or certification in the following will be an asset:

- Impact of footcare on long term health
- Footcare related to sporting endeavors
- Injury and tissue healing
- Competent and knowledgeable in the following:
 - Diabetic foot care
 - Sports and traumatic injuries
 - Biomechanical assessments and orthotic therapy
 - Pediatric foot conditions
 - Wound care.
- Interest in strength and conditioning
- Sports-related injury interest or previous experience with this population an asset
 - We work closely with a Strength and Conditioning facility in the same plaza alongside coaches who work with some of the top-level athletes in the area

Foot care professional should be able to:

- Work and manage a caseload independently and with other multidisciplinary team members.
- Candidate will be required to conduct assessments, develop care plans, provide treatment to patients and evaluate progress.
- Maintain accurate and complete clinical records for each client and submitting reports to the referral source if necessary.

Rate of Pay

- TBD – percentage split of caseload.
 - Determined once the right candidate has been chosen

** New graduates are welcome to apply and encouraged. Successful candidates will be contacted. Please send an email to info@movementhealth.ca with a cover letter and CV.
