

Registered Dietician

We are looking for a passionate, driven and motivated dietitian to join our growing multidisciplinary team. The successful applicant should be looking for an environment to grow as a practitioner in a low stress and supportive environment.

We believe that patient-centered care and a one-on-one experience will allow the best healing environment for our clients. Movement Health strives to create an environment where the therapist feels supported and valued, has a great team and support system in place and can grow their practice surrounded by other professionals encouraging them to learn and better their knowledge on a daily basis.

Our office stresses PREVENTATIVE health care by encouraging regular exercise, movement, body awareness and proper supportive nutrition. Movement Health is looking for the *RIGHT* dietitian to join the team, who is excited to work together with their patients to educate and improve overall health goals.

Setting Type: Multidisciplinary Clinic

Required: Bachelor's or Master's Degree in Dietetics with a license in good standing to practice in Ontario with the College of Dietitians of Ontario, and be able to demonstrate a high ability to apply theoretical knowledge into practice while using problem-solving skills.

- Requires the ability to coach and navigate clients with co-morbidities, safe weight loss and for sport/athletic conditioning/goals.
- Insurance liability to practice

Knowledge and/or certification in the following will be an asset:

- Nutritional impact related to sporting endeavors
- Injury healing and nutrition
- Safe weight loss and relationship to foods for long term success
- Peri-operative nutrition to help with healing patients (those about to undergo joint or injury surgeries)
- Anti-inflammatory diets for those with chronic injuries and arthritis
- Interest in strength and conditioning
- Sports-related injury interest or previous experience with this population an asset
 - We work closely with a Strength and Conditioning facility in the same plaza alongside coaches who work with some of the top-level athletes in the area

Dietician should be able to:

- Work and manage a caseload independently and with other multidisciplinary team members.
- Candidate will be required to conduct assessments, develop care plans, provide treatment to patients and evaluate progress.
- Maintain accurate and complete clinical records for each client and submitting reports to the referral source if necessary.

Rate of Pay

- TBD – percentage split of caseload.
 - Determined once the right candidate has been chosen

** New dieticians are welcome to apply and encouraged. Successful candidates will be contacted.
Please send an email to info@movementhealth.ca with a cover letter and CV.
