

## Physiotherapist

We are looking for a passionate, driven and motivated physiotherapist to join our growing multidisciplinary team. The successful applicant should be looking for an environment to grow as both a practitioner and a skilled manual therapist in a low stress environment.

We believe that patient-centered care and a one-on-one experience will allow the best healing environment for our clients. This is why a maximum of 2-3 patients per hour will be seen depending on the preference of the physiotherapist in a one-on-one clinical setting. Breaks between clients are encouraged to mitigate burnout!

Movement Health strives to create an environment where the therapist feels supported and valued, has a great team and support system in place and can grow their practice surrounded by other professionals encouraging them to learn and better their knowledge on a daily basis.

Our office stresses PREVENTATIVE health care by encouraging regular exercise, movement and body awareness. Movement Health is looking for the *RIGHT* physiotherapist to join the team who is excited to work together with their patients to educate and improve overall health goals.

### Setting Type: Clinic

**Required:** Master's Degree in Physiotherapy with a license in good standing to practice in Ontario with the Ontario College of Physiotherapy, and be able to demonstrate a high ability to apply theoretical knowledge into practice while using problem-solving skills.

### Knowledge and/or certification in the following will be an asset:

- Neurofunctional acupuncture (McMaster Program will be preferred but not required – any acupuncture or dry needling knowledge)
- Functional Range Conditioning
- Functional Range Release
- Active Release Therapy
- Manual manipulations
- Thorough rehabilitative knowledge including principles of pilates and yoga will be an asset.
- Those with pelvic floor training will also be considered
- Interest in concussion management (*Shift* or *STOP* concussion management)
- Interest in strength and conditioning
- Sports-related injury interest or previous experience with this population an asset
  - We work closely with a Strength and Conditioning facility in the same plaza alongside coaches who work with some of the top-level athletes in the area

### Physiotherapist should be able to:

- Work and manage a caseload independently and with other multidisciplinary team members.
- Candidate will be required to conduct assessments, develop care plans, provide treatment to patients and evaluate progress.
  - We currently only see WSIB and MVA clients on a limited basis and at the practitioner's discretion if they would like to provide this service.
- Maintain accurate and complete clinical records for each client and submitting reports to the referral source if necessary.

- Comfortable providing virtual care through our online system
- Comfortable offering mobile services and visiting clients in their home or office setting
- Interested in helping to create a virtual online system for exercise rehabilitation and willing to participate in video content creation for online sales (including creating programs for knee and hip replacement, ACL reconstruction and ankle sprains etc.)
  - These programs will help to create a generic platform to use and can be altered to individualize treatment rehabilitation (catered one-on-one and individualized programs will always be our first option but may not be accessible to all)

**Rate of Pay**

- TBD – hourly rate will be considered at a competitive rate or percentage split is also possible.
  - Determined once the right candidate has been chosen

\*\* New physiotherapists are welcome to apply and encouraged to start mentorship opportunity

Successful candidates will be contacted. Please send an email to [info@movementhealth.ca](mailto:info@movementhealth.ca) with a cover letter and CV.
